## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 30-37, 39, 46-48, 54-56, 60-63, 68 and 69 of copending Application No. 10/715,610. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the limitations of the instant claims are fully encompassed and envisioned in the co-pending claims. One having ordinary skill in the art would understand that the treatment processes are applicable to various types of contaminated water.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1724

4. Claims 16-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 16 recites the limitation "the collection device" in line 2. There is insufficient antecedent basis for this limitation in the claim. Claims 17-24 are rejected for depending from a rejected claim.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1 and 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Benskin et al. (5,262,047).

8. Benskin et al. '047 teach a system for purifying water, comprising a drum filter (24) having an automatic solids removing device, oxidant injection points (A, B, C, D) for injecting a gas such as ozone or hydrogen peroxide, a mixer (22) for mixing the oxidant injected at point A, a duplex filter system (36) for filtering water downstream of the mixer, and a recycle line for sending treated water from a valve (44) back to the system for reuse and further treatment (see figures 1a, 1b, col. 3, lines 3-59, col. 4, lines 34-40, col. 5, lines 1-29). Any of the oxidant injectors are capable of injecting a fluid disinfectant or ionized gas. Note that for examination, the limitation "ionized gas" is taken not to include simple ozone, which is distinguished in the prior art from ionized air or oxygen.

*Conclusion*

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references listed on the attached PTO-892 form disclose water treatment systems.
